

Care Programme

In May, 2019 the Information and Career Guidance Cell of IQAC conducted an online survey among the students asking them a lot of questions about their background, the reason for choosing the particular subject as honours, their preferred career, hobbies etc. During 15-31 August, 2020 the cell conducted a telephonic survey among the registered participants of 6th semester asking them if they have changed their career preferences and if they want any assistance from the Information and Career Guidance Cell. Seven faculty members of the cell called 105 students of the 6th semester in this survey.
